- **Canvas:** This is where you create and edit your designs.

- **Toolbar:** The toolbar provides access to essential tools and functionality.

- **Layers:** The layers panel allows you to organize and control the different elements of your design.

To create your first project, click on the "New Project" button. This will open a blank canvas where you can start adding images, text, and shapes. Use the toolbar to select and manipulate these elements, adjusting their size, color, and position.

To add an image to your design, click on the "Upload" button and select the image file from your computer. Alternatively, you can search for images in Design Space's library. To add text, click on the "Text" tool and type in your desired text. Customize the font, size, and color to suit your project.

Layers are crucial for organizing complex designs. Each element in your design is placed on a separate layer. You can rearrange layers by dragging and dropping them in the Layers panel. To hide or lock a layer, click on the eye or lock icon next to its name.

Once you're satisfied with your design, save it to your Cricut account. You can also share your project with others by clicking on the "Share" button. This will generate a link that you can share via email or social media.

When you're ready to cut your design, click on the "Make It" button. Design Space will prompt you to select your Cricut machine and the material you're using. Follow the on-screen instructions to load your material and start cutting.

Once you've mastered the basics, you can explore Design Space's advanced features to take your crafting to the next level:

- **Offset and Weld:** These tools allow you to create intricate designs by offsetting or welding different shapes together.

- **Contour Cut:** This feature lets you cut around the edges of printed images, creating precise and complex shapes.

- **Print then Cut:** Use this technique to add intricate designs to pre-printed paper or fabric.

- **Templates and SVG Files:** Import templates and SVG files into Design Space to create custom designs from scratch or use ready-made designs.

- **Design by Me:** This feature allows you to design your own fonts and elements, unlocking endless possibilities.
