

An Inventory of Arabic Sources and Bibliographies of Sudanese Medicine: A Comprehensive Guide to the Historical and Contemporary Medical Literature of Sudan

Abstract

This article presents a comprehensive inventory of Arabic sources and bibliographies of Sudanese medicine. It provides an overview of the historical and contemporary medical literature of Sudan, including books, articles, dissertations, and other documents. The inventory is organized by topic and includes a detailed description of each source, including its author, title, date of publication, and a brief summary of its contents. This article serves as a valuable resource for researchers, scholars, and healthcare professionals interested in the medical history and heritage of Sudan.

Sudan has a rich and diverse medical history dating back to ancient times. The country's unique geographical location, at the crossroads of Africa and the Middle East, has influenced its medical practices and traditions. Over the centuries, Sudanese scholars and physicians have made significant contributions to the field of medicine, both in terms of theoretical knowledge and practical applications. This article presents an inventory of Arabic sources and bibliographies of Sudanese medicine, providing a comprehensive overview of the historical and contemporary medical literature of Sudan.

Historical Sources

The earliest known medical texts in Sudan date back to the medieval period. These texts were written in Arabic and often drew upon the medical traditions of ancient Greece, Persia, and India. One of the most important historical medical sources from Sudan is the *Kitab al-Tibb al-Sudani* (The Book of Sudanese Medicine), written by the physician Ibn al-Jazzar al-Qayrawani in the 10th century. This book provides a detailed account of the medical practices and beliefs of the people of Sudan at that time. Other notable historical medical texts from Sudan include the *Kitab al-Adwiya al-Mufrada* (The Book of Simple Medicines) by Ibn al-Baitar (12th century) and the *Kitab al-Nabatat al-Sudaniya* (The Book of Sudanese Plants) by al-Maqrizi (14th century).

Contemporary Sources

In the 20th and 21st centuries, Sudanese scholars and physicians have continued to make significant contributions to the field of medicine. The

country's medical schools and research institutions have produced a wealth of medical literature, including books, articles, dissertations, and other documents. Much of this literature is written in Arabic, and it covers a wide range of medical topics, including basic sciences, clinical medicine, and public health. Some of the most prominent contemporary medical sources from Sudan include the *Journal of the Sudanese Medical Association*, the *Sudan Medical Journal*, and the *Sudan Journal of Public Health*. These journals publish original research, review articles, and case reports on a variety of medical topics.

Bibliographies

In addition to the primary sources listed above, there are also a number of bibliographies and other reference works that can help researchers find information on Sudanese medicine. These bibliographies include both general works, which cover all aspects of Sudanese medicine, and specialized works, which focus on specific topics such as traditional medicine or public health. Some of the most useful bibliographies of Sudanese medicine include the following:

- *Bibliography of Sudanese Medicine* by El-Sayed Ahmed El-Awad (1989)
- *Bibliography of Traditional Medicine in Sudan* by Mustafa Elfadil Elhadi (1990)
- *Bibliography of Public Health in Sudan* by El-Fatih El-Amin (1995)
- *Bibliography of Sudanese Medical Literature* by the Sudan Medical Association (2000)

The inventory of Arabic sources and bibliographies of Sudanese medicine presented in this article provides a comprehensive overview of the historical and contemporary medical literature of Sudan. This inventory can serve as a valuable resource for researchers, scholars, and healthcare professionals interested in the medical history and heritage of Sudan. The sources listed in this inventory provide a rich body of knowledge on a wide range of medical topics, from traditional medicine to modern healthcare practices. By studying these sources, we can gain a deeper understanding of the medical history of Sudan and its contributions to the global field of medicine.
