

Proceedings Of The 23rd International Conference On Industrial Engineering And Operations Management: Advancing Technology And Innovation For Global Competitiveness

The IEOM conference is a premier event in the field of industrial engineering and operations management, bringing together researchers, practitioners, and students from around the world to share their latest research findings and discuss the latest trends in the field. The conference theme for 2023 was "Advancing Technology and Innovation for Global Competitiveness," and the program featured a wide range of presentations on cutting-edge topics such as artificial intelligence, big data, and supply chain management.

The conference featured keynote addresses from some of the leading experts in the field of industrial engineering and operations management. The keynote speakers included:

- **Dr. Yushuai Huang**, Professor of Industrial Engineering and Operations Management at the University of Michigan
- **Dr. Qinghua Zhu**, Professor of Industrial Engineering and Operations Management at Tsinghua University
- **Dr. Mei Cai**, Professor of Industrial Engineering and Operations Management at the University of California, Berkeley

In addition to the keynote addresses, the conference featured a wide range of technical sessions on a variety of topics related to industrial engineering and operations management. The technical sessions were organized into the following tracks:

Proceedings of the 23rd International Conference on Industrial Engineering and Engineering Management 2024: Theory and Application of Industrial Engineering

- **Track 1: Artificial Intelligence and Machine Learning**
- **Track 2: Big Data and Analytics**
- **Track 3: Supply Chain Management**
- **Track 4: Operations Management**
- **Track 5: Ergonomics and Human Factors**
- **Track 6: Healthcare Systems and Operations**
- **Track 7: Sustainability and Environmental Management**
- **Track 8: Education and Training in Industrial Engineering**

The conference also featured a number of special events, including a welcome reception, a banquet, and a technical tour of a local manufacturing facility.

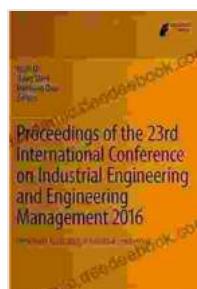

The IEOM conference was a great success, with over 1,000 attendees from over 50 countries. The conference provided a valuable opportunity for researchers, practitioners, and students to share their latest research findings and discuss the latest trends in the field of industrial engineering and operations management.

Proceedings of the 23rd International Conference on Industrial Engineering and Operations Management

The proceedings of the 23rd International Conference on Industrial Engineering and Operations Management are now available online. The proceedings include the full text of all of the papers that were presented at the conference. The proceedings are a valuable resource for researchers, practitioners, and students in the field of industrial engineering and operations management.

The proceedings can be accessed online at the following address:
